EG’s position as one of the leading IT service companies in Scandinavia is built on close relationships with our customers, industry knowledge and solid IT skills. We help our customers every day to accomplish small and big challenges, all to make them reach better productivity and increased competitiveness. Our customers are some of the largest companies in Sweden who are especially active within production, distribution and retail. We are constantly expanding through recruitment of competent co-workers in several of our Swedish offices.

We will hire you because of your personality and drive. You will during the journey with EG get the possibility to get acquainted with different business processes and industries, and at the same time get a deep understanding of market leading IT-systems and business intelligence.

Read more at [www.eg.se/graduate](http://www.eg.se/graduate) or come and talk to us at Systemvetardagen 2018.

På Innofactor jobbar vi i team där du får arbeta tillsammans med kollegor som har bred erfarenhet och stort teknikintresse som gärna delar med sig av sin kunskap. Du kommer att få arbeta i spännande kundprojekt där våra kunder befinner sig mitt i sin digitaliseringsresa.

Vi erbjuder stora utvecklingsmöjligheter och möjlighet att påverka och bidra till både din egen personliga utveckling såsom företagets tillväxt.

Första gången vi träffade Denise var på Systemvetardagen. Idag jobbar hon som Service Delivery Manager där hon säkerställer förvaltningen av våra lösningar hos våra kunder.

Vill du också starta din karriär med oss? Gå in på karriar.innofactor.se och läs mer om oss och våra tjänster!

Bedege has, since established in 1985, provided hardware, software and services to the retail industry. In the earlier years more focus was on hardware, but since 1998 when Bedege became an LS Retail partner the focus changed to solutions and consultancy services related to the solutions. As from 2010 our support and maintenance services are radically extended and has become an additional focus area, even more important than pure software implementations. When it comes to providing services we normally take responsibility for the whole project together with support and maintenance after deployment. Only providing consultants with a certain competence to a customer where we do not have a larger long-term relation is very rare. We prefer not to work in this way.

About us

Combitech is one of the Nordic region’s largest technology consulting firms. We combine technical expertise with in-depth industry knowledge, all-round capability and a particular focus on the environment and security. This results in customised, sustainable solutions for demanding clients who are active both in the Nordic region and internationally. At the heart of our services are people who work in close partnership with our clients – our technology consultants. What is special about Combitech’s consultants is that they combine cutting edge expertise with professionalism, a personal approach and an ability to build constructive, long-term relationships. Combitech is an attractive employer for both talented new graduates and experienced consultants as it offers them a wealth of opportunities for personal and professional development.

About us
Vidispine creates cloud-based video content management solutions based on our enterprise-grade media asset management backbone, with capabilities exposed by well documented and robust APIs. We aim to standardize media asset management, enabling organizations to focus on their business instead of technology. We have been awarded the DI Gasell award for being one of the fastest growing companies in Sweden during last year and will continue to grow. Our customers are global, and as part of Arvato Bertelsmann we are represented in most parts of the world. We will hire developers both in Stockholm and Umeå during 2018.

Area of business
System development for video solutions

Desirable qualifications
We work with many different technologies, languages and system dependent on role, for example Java, Jira, REST APIs, GIT, SQL, Drop Wizard, Django, AngularJS, Docker and Ubuntu, HTML, CSS, Javascript, Adobe Photoshop, Sketch and Invision.
